

CSIM 20 Order Form – Educational

The CSIM 20 Simulation Software for the Educational License is meant for teaching (not research) uses within institutions of higher learning. To qualify, a Statement of Educational Use must be signed by the Department Chair. Funded research projects must use one of the Corporate (Professional) Licenses. The software package consists of C or C++ copies of the library, header and example files, documentation for each of the operating platforms and the Software License Agreement. The Software License Agreement is enclosed.

Single Seat License

The Single Seat License allows for use on a single computer at any one time for C or C++ libraries of a single platform.. A free Personal License for the same user is also available for use on a laptop or the licensee's home computer (for PC environments only) when it is not in use on the licensed platform. A special request which includes user and use information must be submitted.

Departmental Licenses

The Single-Environment Departmental License is for use on all workstations of a *single* operating system in a departmental lab, and the Multi-Environment Departmental License is for use on all workstations and *all* CSIM-supported environments (when ordered at the same time) in a departmental lab.

Support

Installation and bug-fix support is available for 90 days through e-mail and fax only on an as-available basis through a designated support contact. An Extended Support Agreement that covers unlimited fax or email, bug-fix updates, and feature enhancement upgrades is also available. All development seats at the site must be covered.

Single Seat Licenses

\$360 each seat X _____ (number of seats) Total _____

Departmental Licenses

Single-Environment Departmental License \$1100
 Multi-Environment Departmental License \$1400 Total _____
