

## CSIM 20 Order Form – Professional

The CSIM 20 Simulation Software for the Professional License is meant for use within an organization. The software package consists of one binary license of the library, header and example files, documentation, and the Software License Agreement for either C or C++ and one operating platform. The Software License Agreement is enclosed.

### Professional License

Each Professional License allows for use on a single computer at any one time. If you want to use CSIM on more than one type of platform (such as Windows and Solaris), then you must license at least one license of each version of CSIM. A free Personal License for the same user is also available for use on a laptop or the licensee's home computer (for PC environments only) when it is not in use on the licensed platform. A special request which includes user and use information must be submitted.

### Support

Basic Support, which includes installation and bug-fix support by e-mail, is free for one year with license purchase. An Extended Support Agreement, which covers unlimited phone, fax, and email support, bug-fix updates, and feature enhancement upgrades at a 50% discount of published price, is also available. If purchased, licensee must purchase one Extended Support Agreement for each licensed seat at the site.

### Professional Run-Time Licenses

A Professional Run-Time License is also available that permits the simulation engine to be embedded into a compiled version of the simulation model for distribution within the organization using at least one Professional Edition. The license is not available for either the Personal License or in models distributed outside the organization. A CSIM Run-Time license is required for each license of a distributed application.

### Platforms and Languages Selection

- |  |  |
|--|--|
| <input type="checkbox"/> MS Windows (95, 98, NT, 2000, XP)<br>MS Visual C/C++ version 6 (32 bit)<br>MS Visual Studio 2005 (32 bit)<br>MS Visual Studio 2008 (32 and 64 bit)<br>MS Visual Studio 2008 Express (32 bit)<br>Cygwin (32 bit - gcc/g++) | <input type="checkbox"/> Solaris 86 - both SPARC and x86<br>SunSoft Forte 6<br>gcc/g++ (32 and 64 bit)<br>Sun Studio C/C++ (32 and 64 bit) |
| <input type="checkbox"/> Mac OS-X Intel<br>gcc/g++ (32 and 64 bit)   | <input type="checkbox"/> Linux (any version)<br>gcc/g++ (32 and 64 bit)  |

*Each platform includes both C and C++ versions of CSIM.*

*Please contact Mesquite if you need CSIM 19 for PPC or AIX, or if you require CSIM 20 with support for position-independent code.*

### Professional License (check one)

- |   |  |
|---|--|
| <input type="checkbox"/> 1 license = \$1195                   | <input type="checkbox"/> 4 licenses @ \$870/license = \$3480                 |
| <input type="checkbox"/> 2 licenses @ \$1020/license = \$2040 | <input type="checkbox"/> 5 licenses @ \$870/license = \$4350                 |
